

Automated Residential Collection

On **May 1st, 2017**, the City of Lincolnton will begin using vehicles which operate a mechanical arm to lift and empty our 96-gallon roll-out cart and then return the container to its original position. Since the automated collection vehicle requires a crew of only one driver, as compared to a crew of three, the long term financial savings in labor cost will be significant.

How can you help us with the new trucks?

Place carts with the wheels facing your home and the opening of the lid facing the street.

Keep carts 3 feet from another cart, parked cars, mailboxes, poles, etc.

Place carts on a level area adjacent to the street or sidewalk.

Please bag all garbage placed in your cart.

Please make sure the lid is closed on your cart.

Make sure lid is closed

Side facing road

Side toward home

3 ft clearance from other obstructions
